

PRANAV BANSAL

DevOps Engineer

+919812005737 ◇ Gurugram, India ◇ okpranavbansal@gmail.com ◇ github.com/okpranavbansal

PROFESSIONAL SUMMARY

Software Development Engineer (DevOps) with hands-on experience building and operating highly available cloud platforms at scale. Experienced in developing CI/CD tooling, cloud automation, and observability systems on AWS, with a strong focus on reliability, security, and performance.

WORK EXPERIENCE

DevOps Engineer Wyzard.ai	Jan 2024 – Present <i>Gurugram, India</i>
- Operated and scaled production AWS infrastructure supporting 1M+ users across 80+ Kubernetes-based microservices, collaborating with senior DevOps and SRE engineers. - Participated in on-call rotations for ECS Fargate-based production services, responding to incidents, performing root cause analysis, and implementing fixes to improve reliability. - Built and operated Amazon ECS (Fargate) deployments alongside Kubernetes-based services, enabling blue-green and rolling deployment strategies for zero-downtime releases. - Implemented and operated monitoring, logging and tracing using Prometheus, Grafana, Loki, Tempo, Datadog, and New Relic to improve incident detection and response. - Developed and maintained infrastructure as code to provision and manage scalable cloud environments. - Led multi-account AWS migrations, ensuring service continuity, data integrity and minimal downtime. - Drove cloud cost optimization initiatives, reducing AWS spend by 50–60% through Spot Instances, EC2 right-sizing, RDS tuning and ECR optimization. - Designed and implemented Jenkins pipelines with ECS runners, enabling auto-scaling workloads and reducing GitLab CI/CD pipeline failures by 30%. - Managed production NoSQL databases (DynamoDB, MongoDB) and self-hosted systems (Neo4j, ClickHouse), overseeing deployments, performance tuning, and automated backup strategies. - Designed and operated cloud infrastructure for AI-driven B2C and B2B platforms, including a 10k+ MAU chatbot, enabling LLM-based workflows using Amazon Bedrock and experimentation with Amazon SageMaker. - Implemented cloud security best practices including IAM policies, network segmentation, secrets management and incident response workflows.	

TECHNICAL SKILLS

Cloud Platforms	AWS, Azure, GCP
Infrastructure as Code	Terraform, CloudFormation
Containers & Orchestration	Docker, Kubernetes, Amazon ECS
CI/CD	GitLab CI, Jenkins, GitHub Actions
Observability	Prometheus, Grafana, Loki, Tempo, Datadog, New Relic
Programming	Python, Bash, Groovy, Java, C, C++
Operating Systems & Tools	Linux (Ubuntu, RHEL), SonarQube, PagerDuty

EDUCATION

Bachelor of Engineering in Computer Science , Chitkara University	CGPA 9.75/10
High School in Non-Medical , CBSE	CGPA 9.5/10

CERTIFICATIONS

AWS Certified Cloud Practitioner — Datadog Fundamentals — Kubernetes for Beginners — Ultimate AWS SysOps

ACHIEVEMENTS

- Runner up, Hackathon 2025 — Built a real time analytics platform using Kafka, Apache Pinot, Superset.
- Finalist, Hackathon 2023 — Developed a face recognition system using Python.
