

Pranav Bansal

Site Reliability & Platform Engineer · Gurgaon, India / Remote
<https://www.linkedin.com/in/okpranavbansal/> · <https://github.com/okpranavbansal/>

EDUCATION & CERTIFICATIONS

Bachelor of Engineering (B.E.) in Computer Science, Chitkara University · 2021–2025 · CGPA: 9.77/10
AWS Certified Cloud Practitioner · Datadog Fundamentals · Kubernetes for Beginners

TECHNICAL SKILLS

Core SRE: SLI/SLO Design, Error Budget Management, Incident Response, Blameless Postmortems, Toil Reduction, Capacity Planning
Cloud & Infrastructure: AWS, GCP, Terraform, CloudFormation, Helm, Kustomize, Workload Identity, Cloud Armor, IAM
AI/ML Ops: Vertex AI (Model Garden, Agent Engine), Amazon Bedrock, Agentic Orchestration, Eval-Driven Quality Gates
Containers & CI/CD: Kubernetes (GKE, EKS), Docker, ECS Fargate, ArgoCD, Jenkins, GitLab CI, SOPS/KSOPS, git-crypt
Observability: Prometheus, Grafana, Loki, Tempo, Datadog, Langfuse, New Relic
Languages & Data: Python, Go, Bash, Java, PostgreSQL, Redis, MongoDB Atlas, ClickHouse, Neo4j, DynamoDB

PROFESSIONAL EXPERIENCE

Wyzard.ai (Nexura Technologies) Nov 2025 – Present
28+ microservices, Agentic AI Platform

- Senior AI Platform Engineer** promoted 1 Apr 2026 from Engineer
- Partnered directly with founders/CXOs to lead end-to-end AWS → GCP migration (ECS Fargate → GKE), building scalable AI model-serving infrastructure for 28+ microservices.
 - Built self-healing GitOps delivery via ArgoCD (App of Apps pattern) with KSOPS sidecars for on-the-fly SOPS secret decryption, reducing deployment toil by 40%.
 - Secured Kubernetes boundary using GCP Gateway API, HTTPRoutes, and Cloud Armor; enforced least-privilege via GKE Workload Identity Federation.
 - Engineered eval-driven quality gates for AI workflows on Vertex AI (Model Garden, Agent Engine) and observability dashboards using Datadog and Langfuse.

Roundcircle Technologies Jan 2024 – Oct 2025
Key Projects: ASTRA (OLX Indonesia) & Wyzard.ai

- Engineer (DevOps / SRE)** Jun 2025 – Oct 2025
- ASTRA (OLX Indonesia)::** Supported team-led New Relic → Datadog & Grafana (Loki) observability migration for 80+ microservices (9M+ MAU), contributing service onboarding and log pipeline validation.
 - ASTRA (OLX Indonesia)::** Refactored Terraform code for OLX Indonesia apps, improving IaC maintainability, module readability, and environment consistency.
 - Wyzard.ai::** Built Jenkins CI/CD pipelines with auto-scaling ECS runners and git-crypt/S3-backed ECS secrets storage; deployed LGTM observability, reducing deployment failures by 30%.
 - Wyzard.ai::** Executed seamless AWS cross-account migrations during entity spin-off, re-architecting IAM trust policies and VPC peering with zero downtime.
 - Wyzard.ai::** Reduced AWS spend by 50–60% via Spot strategy and RDS tuning; managed production databases (DynamoDB, MongoDB Atlas) and analytics engines (ClickHouse, Neo4j).

- Engineer Intern** Converted to Full-Time · Jan 2024 – May 2025
- Provisioned baseline cloud environments across dev, staging, and production using Terraform, establishing IaC standards that eliminated environment parity drift.
 - Containerized 5+ monolithic legacy applications with Docker, integrating them into automated GitLab CI pipelines and cutting release cycles from days to hours.
 - Authored 10+ runbooks and SOPs for incident response, reducing new-hire on-call ramp-up time and onboarding toil.

PROJECTS & ACHIEVEMENTS

- AWS → GCP Migration Playbook:** Authored a comprehensive migration guide covering ECS→GKE workload migration, IAM-to-Workload-Identity mapping, and VPC networking rebuild.
- Hackathon 2025 (Runner Up):** Built a real-time analytics platform using Kafka, Apache Pinot, and Superset.
- Hackathon 2023 (Finalist):** Developed a face-recognition system using Python.
