AI Infrastructure & SRE Engineer

+91 98120 05737 — okpranavbansal@gmail.com

PROFESSIONAL SUMMARY

AI Infrastructure and SRE engineer with production ownership across cloud-native platforms, Kubernetes, and CI/CD systems. Delivered zero-data-loss AWS to GCP migration, reduced AWS spend by 50–60%, and improved reliability for LLM-based production workflows.

EXPERIENCE

AI Infrastructure Engineer / SRE

wyzard.ai (Nexura)

Nov 2025 – Present

Gurugram, India

- Led end-to-end AWS → GCP migration (ECS Fargate → GKE), rebuilding IAM, Workload Identity, ingress, storage classes, and VPC networking with zero data loss and no major incidents.
- Own production reliability for 20–25 services, including on-call response, root-cause analysis, and postmortems.
- Built AI infrastructure on Amazon Bedrock and SageMaker for LLM-based workflows powering a 10k+ MAU B2C chatbot.
- Applied IAM, Workload Identity, secrets management, and network segmentation controls to harden AI and platform workloads.
- Built Jenkins pipelines with ECS auto-scaling runners, reducing GitLab CI pipeline failures by 30%.
- Implemented multi-cloud observability using Prometheus, Grafana, Loki, Tempo, Datadog, and New Relic to improve detection and recovery.
- Reduced AWS spend by 50–60% through Spot strategy, EC2 right-sizing, RDS tuning, and ECR optimization.

DevOps / SRE Engineer

roundcircle.tech

Jun 2025 – Oct 2025

Gurugram, India

- Supported enterprise infrastructure for ASTRA (OLX Indonesia), a classifieds platform with 9M+ MAU and 80+ microservices.
- Operated ECS Fargate production services with incident response ownership and reliability fixes.
- Built and maintained CI/CD pipelines with blue-green and rolling deployment patterns for zero-downtime releases.
- Developed Terraform-based AWS infrastructure and contributed to observability and cost optimization.

DevOps / SRE Intern

roundcircle.tech

Jan 2024 – Jun 2025

Gurugram, India

- Contributed to production cloud operations, CI/CD automation, monitoring, and incident support across service environments.

PROJECTS & ACHIEVEMENTS

- **Hackathon 2025 (Runner Up):** Built a real-time analytics platform using Kafka, Apache Pinot, and Superset.
- **Hackathon 2023 (Finalist):** Developed a face-recognition system using Python.

TECHNICAL SKILLS

- **Cloud & IaC:** AWS, GCP, Terraform, CloudFormation
- **AI Platform & Agent Ops:** Amazon Bedrock, SageMaker, LLM workflow operations, tool-connected AI systems
- **Containers & Compute:** Kubernetes, Docker, Amazon ECS, GKE
- **CI/CD & Automation:** GitLab CI, Jenkins, GitHub Actions, Bash, Groovy
- **Observability:** Prometheus, Grafana, Loki, Tempo, Datadog, New Relic
- **Databases:** DynamoDB, MongoDB, Neo4j, ClickHouse
- **Security & Systems:** IAM, Workload Identity, Secrets Management, Network Segmentation, Linux
- **Programming:** Python, Java, C, C++

EDUCATION & CERTIFICATIONS

B.E. in Computer Science, Chitkara University

CGPA: 9.77/10

AWS Certified Cloud Practitioner — Datadog Fundamentals — Kubernetes for Beginners — Ultimate AWS SysOps
