Database Management
DevOps

Soft

Team Management
Time Management
Interpersonal Communication
Accountability

LANGUAGES

C, C++
Python
Java
HTML, CSS
JavaScript
SQL

PROFILE

Dedicated and passionate learner with a strong commitment to create innovative and efficient solutions. Eager to take on new challenges, I thrive in collaborative environment and excel in problem-solving. Committed to staying updated with the latest industry trends and technologies to drive innovation and enhance project outcomes.

PROJECTS

• Text Editor

In this project, I tried to solve an interesting problem i.e getting to type my notes in vim with my own shortcut keys like in windows. With C as the base coding language. I made this whole project in vim and the solution was just amazing. We can type notes and even codes in much easeful manner in our own terminal.

• Trip Manager

Made a Trip Manager Application using HTML, CSS, JS. In this Project I learned how to implement JavaScript and made an interesting and awesome UI for the consumers using CSS frameworks like Bootstrap. Used AWS as my hosting partner to deploy my Website over the Internet.

• Carte(Map)

In this custom university map, I've meticulously charted the campus layout, highlighting key buildings, facilities, and important landmarks for effortless navigation. The map provides a user-friendly, comprehensive overview, enhancing the university experience for students and visitors alike.

• Face Recognition Model

Designed in Python and as the name suggests it tell us about the person sitting in front of the screen. Use case of this model could be seen for example our attendance. In this we store images of the students

CERTIFICATION

• Advance Front-End Web Development with React

By Coding Ninjas

• Cloud Computing

My Anatomy

• Dynamic Public Speaking

University of Washington , Coursera

WORK EXPERIENCE

Google Developers Student Club

Core Member

2021-2022

Worked in a DevRel from where I learned how to manage a club and how to bring the best in front of the whole world. I learned a lot of soft as well as technical skills from my seniors.
