

PRANAV BANSAL

Site Reliability Engineer

+91 98120 05737 — okpranavbansal@gmail.com — [LinkedIn](#) — [GitHub](#)

EDUCATION & CERTIFICATIONS

B.E. in Computer Science, Chitkara University

2021 – 2025 — CGPA: 9.77/10

AWS Certified Cloud Practitioner — Datadog Fundamentals — Kubernetes for Beginners

TECHNICAL SKILLS

- **Core SRE:** SLI/SLO Design, Error Budget Management, Incident Response, Blameless Postmortems, Toil Reduction, Capacity Planning
- **Cloud & Infrastructure:** AWS, GCP, Terraform, CloudFormation, Helm, Kustomize, Workload Identity, Cloud Armor, IAM
- **AI/ML Ops:** Amazon Bedrock, SageMaker, LLM Workflow Reliability, Agentic Orchestration (MCP), Eval-Driven Quality Gates
- **Containers & CI/CD:** Kubernetes (GKE, EKS), Docker, ECS Fargate, ArgoCD (App of Apps), Jenkins, GitLab CI, SOPS/KSOPS
- **Observability:** Prometheus, Grafana, Loki, Tempo, Datadog, Langfuse, New Relic
- **Languages & Data:** Python, Go, Bash, Java — PostgreSQL, Redis, MongoDB Atlas, ClickHouse, Neo4j, DynamoDB

EXPERIENCE

Wyzard.ai (Nexura Technologies) — 28+ microservices, Agentic AI Platform

Gurugram

AI Infrastructure Engineer / SRE

Nov 2025 – Present

- Led end-to-end AWS → GCP migration (ECS Fargate → GKE), architecting scalable AI model-serving infrastructure that achieved 99.99% availability for 28+ microservices.
- Built self-healing GitOps delivery via ArgoCD (App of Apps pattern) with KSOPS sidecars for on-the-fly SOPS secret decryption, reducing deployment toil by 40%.
- Secured Kubernetes boundary using GCP Gateway API, HTTPRoutes, and Cloud Armor; enforced least-privilege via GKE Workload Identity Federation.
- Engineered eval-driven quality gates for AI workflows (Amazon Bedrock) and observability dashboards using Datadog and Langfuse, adhering to defined SLOs and error budgets.

Roundcircle Technologies — Key Projects: ASTRA (OLX Indonesia) & Wyzard.ai

Gurugram

DevOps / SRE Engineer

Jun 2025 – Oct 2025

- **ASTRA (OLX Indonesia):** Led New Relic → Datadog & Grafana (Loki) observability migration for 80+ microservices (9M+ MAU), reducing Mean Time to Detection (MTTD) by 60%.
- **ASTRA (OLX Indonesia):** Led blameless post-mortems and incident response protocols, reducing MTTR by identifying systemic weaknesses and enforcing reliability standards.
- **Wyzard.ai:** Architected infrastructure from scratch, building Jenkins CI/CD pipelines with auto-scaling ECS runners and deploying the LGTM observability stack, reducing deployment failures by 30%.
- **Wyzard.ai:** Executed seamless AWS cross-account migrations during entity spin-off, re-architecting IAM trust policies and VPC peering with zero downtime.
- **Wyzard.ai:** Reduced AWS spend by 50–60% via Spot strategy and RDS tuning; managed production databases (DynamoDB, MongoDB Atlas) and analytics engines (ClickHouse, Neo4j).

Engineer (Intern → Full-Time Conversion)

Jan 2024 – May 2025

- Provisioned baseline cloud environments across dev, staging, and production using Terraform, establishing IaC standards that eliminated environment parity drift.
- Containerized 5+ monolithic legacy applications with Docker, integrating them into automated GitLab CI pipelines and cutting release cycles from days to hours.
- Authored 10+ runbooks and SOPs for incident response, reducing new-hire on-call ramp-up time and onboarding toil.

PROJECTS & ACHIEVEMENTS

- **AWS → GCP Migration Playbook:** Authored a comprehensive migration guide covering ECS→GKE workload migration, IAM-to-Workload-Identity mapping, and VPC networking rebuild.
- **Hackathon 2025 (Runner Up):** Built a real-time analytics platform using Kafka, Apache Pinot, and Superset.
- **Hackathon 2023 (Finalist):** Developed a face-recognition system using Python.
